About the speaker: Dr. Ding serves as both the engineering manager and the chief engineer for the largest civil engineering firm, i.e., M&E Pacific, Inc., in Hawaii. He manages a group of 30+ project managers, engineers and technicians. He is also in charge of a variety of civil engineering projects with a total of $10+ million design fee and budget.

ABSTRACT: The seminar will briefly introduce career development for civil engineers, and cover the following subjects: types of civil engineering projects in the real world; how the projects are developed, designed and constructed; future civil engineering project development; current local civil engineering market; and civil engineer’s growth path.
