

# CEE691 Seminar Series in Spring 2017

The Department of Civil and Environmental Engineering  
University of Hawaii at Manoa

## Concrete in Hawaii

Mr. Kirk Hashimoto, Executive Director  
Cement and Concrete Products Industry (CCPI) of Hawaii (<http://ccpihawaii.org>)

**Abstract** Concrete is an essential building material for infrastructure construction in Hawaii. Concrete's durability and use of many local ingredients make it a natural choice as a basic building material. Concrete has evolved over the years and will continue to change as new, exciting developments are on the horizon. The role of the engineer is key to the effective use of concrete for low maintenance, long-lasting structures that will serve the people of Hawaii for many years to come.

Tuesday, April 4th  
2:30 p.m. – 3:20 p.m.

Crawford Hall  
Room 105

Building
