

CEE691 Seminar Series in Spring 2017

The Department of Civil and Environmental Engineering
University of Hawaii at Manoa

Career Options for new Engineers with Examination of Common Assignments

Mr. Gary Hutchinson, Wastewater Engineer
Sand Island Water and Wastewater Treatment Plant, the City and County of Honolulu

Abstract We will review possible career paths available to graduating and recently graduated engineers. Propose evaluation methods to determine placement suitability, work life balance and long term career goals. We will review several recent/current projects related to areas of interest for prospective engineers.

Tuesday, March 21th
2:30 p.m. – 3:20 p.m.

Crawford Hall
Room 105
